**The Environmental Impact of toxic – chemical (- as also
of human psychological – mental) Pollutions and Contaminations
on subtle Levels !!!**

Are we and most of us nowadays aware and alert about of , – that all especially human caused pollutions and contaminations are very difficult for the nature and the earth , but to solve these problems really , we have to look about more deeply :

In nowadays common (- *also from today standard scientific*) understanding , just thinking of that a future removal of all toxic elements , wastes , molecules etc. from the soil of the earth or out of the oceans and the air etc. , like just taking them away or picking them up , will be enough – ,

- **but its not like this at all and only** :

Toxic – , poisonous and lethal chemical pollutions and contaminations are effecting the nature , rivers and soils not only through a direct contact of toxins with other materials (- *so that the materials are having a few toxic molecules besides or inside* (- *here also though cluster - effects in water*) , - *and afterwards more or less good only to clean or to disturb them - and everything will be good ones more -*) - ;

- **no – , – there and here is also an very deep impact** (- *also like or as on healthy side - levels , - through good and lovely experiences - , - here also on emotional levels - ; - but now and here on toxic levels and for bad emotional experiences for the nature too , -*) **through an energetic radiation on the subtle levels ,**

- where even if we once will be hypothetically able to clean the earth from any single toxic molecule (- *here in our axiom idea now maybe by filtering , taking or picking them just away -*) , -

the plants and everything around will just grow and behave (- and even animals and human beings will just have (- if nothing else happens additionally - ; - humans - , according to their inner connection with their absolute self and soul , - so potentially and beyond any actual molecular contamination , -) more or less poison related emotions and thoughts , which are the basics of their also future actions ; - so they live and act -) like all the toxins are just here .

Why is it like this ?

Because the cosmos , even the sun and stars , earth and rivers , animals , trees , plants , minerals and also the subtle beings are (- even our outside vision maybe actually different , -) not separated from us and ourselves , – our kind of behaviour or decision of how to act and look towards the (- living - and also just seem to be not living -) cosmos and all beings is very very important and directs deeply all the natural function .

So same like pleasing blessing and inspiring the world around us with our joy , intelligence and love , – and like this , our experiences will sometimes be very deep and lasting for long times , – forming our inside visions of how to live and how to feel – and so also how to act ,

– but (- even as the life – , peace - and love - protecting good is more intensive and effective , - than the controversy destructive – bad ; -) the same functions (- **and this also with materials** -) also on the other side .

Having there (- on subtle levels and dual circumstances) in principle two kinds of toxins or toxic behaviours ,

a) where if the earth is maybe for example by volcano – activity blasting out some (- in their high concentration momentary for us or some beings (- here also in a common nowadays chemical – physical understanding) , - now too -) toxic solids , fluids or gases etc. to the air and all around ,
 – but because the earth (- here also as a real living , conscious motherly loving being -) is acting always to support entire health and healing
 – for the everyone’s good , – these toxins on subtle levels are fine and pleasant ; -

b) but if we as human beings are treating the earth the surrounding cosmos and therefore in reality ourselves , – like being nothing or nil important valuable and act against our all inside absolute and all – one reality ,

– the all – pervading “ OM ” – nipresent love ,

– these (- also because of stupid silly or wicked – criminal egoistic (- from the reality of the inside always Godly self unaware) – interests performed -) injuries and attacks towards the cosmos are very very deep impacting the emotional – as thought – levels of all the atoms around , – therefore also all matters and substances ,

– where (- same , if toxic substances or non – toxic harmless or normally healthy substances where affected though such kind of exceedingly bad experiences , - memorising them inside , - **also alike our own body – and as a small child** -) only highest good , healthy and truly saying , –

- only sweetest love – experiences (- *with extreme contaminations , - only highest conscious – concentrated - and also consequent purest love - and love – identical – (altogether spiritual – and Godly) experiences , -*) could help to come out of .

Could these three different kinds of (- *here for example also steering the microbes in their potencies and decision , - either to help through fermentation and humus – formation , - or to choose the destructive ways to rot , to decay – and wiping out - ; - so for all of us highest important -*) intense influencing and effecting (- **a – , b –** and beyond these both - **the absolute Godly – love -**) experiences ,

- also precisely differenced been felt and measured with (- *one by one also on emotional and thought – respectively on the mental levels in their effects well – known -*) highly significant divining rod – frequencies (- *ps. : I could teach You that highly valuable - , - or give the basics of it , - also ; -*) ,

where we could see surprisingly , that only though appropriate and authentically prayers (- *where we as real human beings are taking and facing the decision , - to live a pure real and all loving life , -*) and the related prayer – and blessing – identical sacred – holy technologies

- here also especially with **AGNI – HOTRA –** and **YAJNA –** fires , – together with all **M A T A T E C – “ OM ” – whirl – technologies –** ,

- out of our heart , – there are coming very special healing – frequencies (- *in the form of bliss*) to us , – to the earth and to the cosmos , – otherwise its – and they are impossible to achieve .

On subtle environmental levels , water and the water – element (- as **JALAPANCAKA** also forming our subtle (- sound , touch , form , smell and taste offering -) bodies ; -) is highly essential .

Same like we are getting happy though nice and lovely experiences only , also water (- here also as real loving being with emotions and thoughts and consciousness) is getting happy only through free water – identical flows , and happy beings all around .

But are there any awful experiences caused from human beings , also for animals and plants etc. (- also our body as the bodies of animals and plants have high percentage of water ; - and many water is in the air too ; -) , -

A) if there has been just before a very good and highly positive enthusiastic – optimistic experience , – the threads of water and other water – drops around are able to withstand for a while or to hold up (- not such strong as before , - but at the positive side -) the healthier status ;

B) (and) if the remembrance of nice and positive experiences is minus – or has gone , – and if there is less – or no real love around ,

– **also all the water – drops around are getting sad and depressed also , – and over them then downwards the threads of water also .**

Are the threads of water leading the suchlike generated subtle – energetic frequencies afterwards (- *in the natural working – cascade of the immune – system of the earth and as a high effective in front - warning*) in microseconds to and into the whole landscape all around (* 1) , – if there is no real love or a happily in naturally meanders flowing river full of healthiest and happiest life and fish and real original functional surrounded forests – ,

– altogether with enough of generated transformative “ OM ” – whirl – structures (- *which means also – and functions only, - if the water of the river is (- by the way of enough of vegetation – cooling through surrounded forests , -) warmer as the surrounded soils*) , – to recharge again by crossing underneath ,

– the whole landscape will suffer and everything upon or in range of the threads of water will though longer time energetic radiation – influences , take these energies also

and **become negative frequency – senders** too !!!

Are the rivers taking naturally – normally the most and majority part of (- also subtle) landscape – healing ,

but if we are having additionally

- because of nowadays (- the rivers in their natural flow – rhythms and flow – structures blocking) dams , weirs and barriers (- plus their storing – function of rubbish and toxic pollutions , - which could cause huge bacterial growth and infection – areas in the barriers front - side -) , -
- because of all (- also in their long – term – and (- never tested upon -) mixture – and combination – effects -) toxic pollutions (- here same agricultural fertilizers , fungicides , pesticides ; - as industrial caused toxins or though common households washed inside high phosphate concentrations or anti – inflammable substances of (- winter – or baby – used -) textiles of modern called clothes (- , which are laying for example as meter thick layers in the Netherlands Rhine – delta) ; - also though the antimony – and (- in living bodies hormone – alike working) softening – contents of plastics and synthetics ; - because of washed inside mineral oils , chemicals (- here also from industrial polluted rains -) , - of medicines and antibiotics -) , -
- but also because of the river – water’s water – quality (- through their (- on subtle levels) worse till ill radiations) destroying turbines and pumps (- nowadays additionally all function on high water – pressures (- and not on suction) , - which is inflaming the situation additionally -) , -

- because of the sometimes huge absent of natural and happy life
 (- here also not enough of " **transformative – " AUM " – whirl – structures "**
happily generating fishes , whales , birds etc. -) and less place and area
 of natural river – meandering – possibilities , -

- but now (- **and this is highest important**) also because through
 not enough of vegetation – cooling of the surrounded soils (- and
 the then also resulting much too less freely and water – alike whirling " **Transforma-**
tive – " AUM " – whirl – structures " -) , -

- all causing and firing up the problems of a **Negative Temperature**
– Gradient of the water (- *which means in short , - that only if water is warmer than*
the surrounded soils , - this water is able to give all stored nutritions to the soils and plants around
, - and also filling up only then the groundwater as it should be -) ,

- **the whole situation is getting more and more worse**

- **till inferior !!!**

So here inside (- till **Side – 10**) a small remark :

1. (- At first , -) The **Positive – or Negative Temperature – Gradient** of water :

This means (- and also in modern hydrology mostly not thought about) , that **the flow and transport of all nutrients is always going from the warmer medium to the cooler one only .**

So , if the water of a river is cooler than the surrounded soils (- here also through too less forests around , - to cool down the surrounded soils through vegetation – cooling , - and also from the water of the dams ; -) , all coming from above or washed inside agricultural fertilizers , chemicals (- plus all the through such a way from the hotter dam's barrier – walls to the inside cold water – body dissolved (- mostly huge amounts of -) concrete substances -) etc. , - are staying inside (- (- as long as the water is not warmer , than the surrounded soils , -) never fertilizing any plants or soils around - ; - and even the refilling of the groundwater – level is going down - ; - whereas the surrounded warmer soils are giving more and more needed nutrients inside of the river , - that the soils are suctioning mineral salts from the underground and helping that the surrounded top – soils are getting longer – term too salted for agriculture) , - till to the ocean ,

– who will hopefully anyhow (- in some time with additional not so nice consequences like algae – growth , warming up and heavier storms ...) clear this worse situation .

2. **A**dditionally if we are heaving dams for electric energy plants ,
 - (- beneath of all the blocked up potentially getting infective wastes in front of
 the dams) also all the (- out of the deeper dam's water - body , - ex-
 tremely cooled down and pressed up -) turbine - water is such cold ,
 that the water is much more heavier than before and as nor-
 mally ,

- that (- beneath of deteriorating the **Negative Temperature - Gradient** -
 situation) the afterwards river - bed (- beneath of all the other bad and
 life - destroying consequences for the river's fauna and flora ... , -) is not
 strong enough anymore to hold its original form and gets de-
 stroyed .

3. **A**re we using then additionally (- as above just talked about) the
 water - quality on subtle levels destroying turbines , pumps , -
 but also (- with same - alike mostly worse subtle frequencies radiating -)
 the rivers or lakes also impacting crossing oil - and gas - pipe-
 lines also according radiating overland - electricity - cables (-
 here also all ships with their also radiating fuels and loadings , -) etc.

(- where all these effects are highest fundamental for the health - functions of
 the earth - and also of the (- either going towards fermentation - or oth-
 erwise towards the destroying - rotting -) functions of all the microbes -) ,

- the rivers have to work too much , - and the resulting diffi-
 culties are growing more and more .

(- Here the above remark is ending)

So ones more in short ,

- are the rivers taking naturally – normally the most and majority part of landscape – healing , – nowadays and because they are suffering too much
 - where also through this situation the groundwater itself could get sad and depressed (- radiating then also for all living beings not so nice , - or better in their effects destroying subtle energy – frequencies , -) (- and because groundwaters are not able to flow freely and fast , - the here for healing needed - “ OM ” - whirl - structures are less , so a healing from the groundwater’s – side will take centuries ; -) too , -

- there is no other way for the rivers anymore as to take the problem to the ocean ,
 - where (- with anything else difficult and risky between , like algae - explosion , warming up of the ocean , death of plankton and fish etc. ... , - at the end and consequently -) though big storms , hurricanes etc. enough of highly needed “ OM ”– whirl – structures are generated again ,

- to find anyhow back to a on energetic subtle levels more healthy and balanced condition

- (- **Here nowadays also with the big question of - , - if in future with human beings or without of them ??? -) .**

Is there (- through the effects of destructive negative subtle energies and frequencies here especially through the earth - immune - system - functions of the threads of water , -) beneath of the regularities and functions of the surrounded micro - organisms also a very difficult to come out circle of evil on subtle levels ,

- which means that the though any kind of (- especially human caused) toxic pollutions and contaminations , - out of ignorant laziness - , or out (- also against any - one - or any - body as any material proceeded -) violence in any (- beneath of physical - chemical - also on human social - emotional - or anyhow sullied inner - vision - (by acting against ourselves as against others) -) form - ,

also (- sometimes very long lasting) difficult subtle energetic fields are generated ,

which are causing (- to these generated subtle fields ; - for all beings , - being inside of these subtle radiations -) related emotions and thoughts (- , - alike of the not so nice social effects of always bad companions or a gang to a before not so much strengthened but in principle good character ; -) , - so also our all future actions .

Are these fields (- also like the otherwise high - quality positive subtle radiation - fields with related healing - frequencies , -) as energy also upholding indirectly the inside felt emotions and thoughts (- also to tell us - as the whole nature -that something is wrong here and to stop immediately -) ,

- (- according to the frequency - intensities) for the inside of these energies being or staying beings (- here especially without any real spiritual - sacred loving - delighting experiences , -) its extremely difficult to decide to come out of - or just to leave .

So , to solve all these severe problems its highly important

- beneath of understanding the deep connection , communion and unity of ourselves and the cosmos - that we are no more separating anymore our sacral and spiritual life , - from profane called life circumstances ; - everything is holy and existent for a highly holy spiritual loving purpose ,
- (- also to set a best highest important example for all other beings to have a real chance , pattern and direction to follow and to reach -) that we are deciding us for the ecologic - ethical good and only - loving way ,
- for all of ourselves and also for all - ones children .

Last Regards and Remarks

Had I've seen a few years ago , – visiting a (– every year performed in our region) jewellery – and rare minerals selling – exhibition , – with –

(– as we know beneath of some very kindly or out of poverty taken minerals and stones , –

- mostly without any aware background or thoughts about , – only for making (– and definitely not to earn) money ,
- sometimes with great suffers and pollutions for the earth ,
- sometimes with scandalous children's – work or under slavery ,
- also from war – regions to finance going on killing or violence against women , children etc. and expulsions of poorer people etc. ,
- also to finance sometimes warlords , criminals , political – or ideological extremists and corrupt also governmental persons ,

just taken without any ethics morals and real believes , – social – and ecological responsibilities , sometimes just violently exploited or robbed , –)

(– but also surely mostly , – without of any prayers and (– beyond of asking the owners of the land where it should be taken from , – by paying them enough of money or dignifying them with help according to the real value ; – and then – also before of everything else behind , –) asking the earth , cosmos and the stones themselves , if they like it to be taken for all the purposes we like to use them (– **what's in fact the only possible and well way**) ; – so with –)

precious – stones , crystals , gems and potential healing – stones (– which are additionally also much more difficult to handle like people are thinking today –) , – here also together with some (– here looking like in mass – production worked up)

SHIVA – Lingams from the **Narmada** – river ,

– coming inside of the presentation – hall , – I was totally shocked !!!

Even if no other person will have recognized it :

All stones and minerals around , – even the metal – parts of all the gems , – they hadn't any kind of subtle radiation or healing – frequencies (- blocking them up (- with no single glimpse to anyone -) by collective resistance , -) anymore !!!

Praying with them , they where looking very sadly although amiably to me – , but in their inner decision to go this way (- here also) of non – violent resistance (- ; - I felt that they (- even through unaware positioning inside a room its quite normal that also this could happen - ; - but here they -) didn't emit also negative subtle frequencies as well - ; - but however -) , – nothing changes .

Am I'm understanding them , – that we have to get aware and conscious about what's happening through our nowadays common kind of actions and visions of the world or cosmos ,

– where (- **if there is no other way anymore for the nature** -) there has sometimes to be a non – violent – caring blockage and resistance against (- here also most interestingly with all our nowadays current flow – or other essential technologies , - basing all on pressures , explosion and heat - ; - as on the more as needed resistance – free suction and on cooling down – methods ; -) as a last remedy to motivate towards a more as needed change .

Helping sometimes also energetically an organic food – store , that the afterwards been sold eating – items are getting also energetically good (- for the whole society and everyone who will eat them afterwards) , – in spite of the use of (- energetically normally not so good or better to say the food badly impacting -) energy – saving – bulbs (- sometimes also the vegetable and fruits energetically destroying halogen – lights) , electro – smog radiating refrigerators and anything more else around ,

- including the subtle radiations though the kind of human cropping , planting , harvesting , treating , working – up , transportation , storing , tricky selling practices on national auctions and wholesale – markets , intentions of farmers , of sellers etc. ...
- but normally and over many years now , all has function very well just by sometimes looking upon and **Mantram** – praying (- **Ps.:** Here since now , - there is no permanent installed **M A T A T E C** – technological system) .

But now , – just a few days back I’ve recognized inside of an other food – store by buying an organic olive – oil , that

- my standard heartily prayer once before reaching the store and at best once more by taking the items and leaving the store for a deeper testing and feeling inside ,
- here without of the use of an additional “ **OM** ” – whirl – structure blessing technique – , – or with the assistant help of a alike operational **Mudram** , – was not able to transform the subtle energies completely as usual **!!!**

But what was really happening was , – that through my prayer the energy – quality – level of this olive – oil was getting for short time higher and better (- energetically of higher quality with only some healing – frequencies , but with much more less than normally -) , – and after some seconds falling down again (- loosing healing – frequencies and the inner harmony (- see here please inside of the **Basics – 3 – script – “ MANTRAM – YANTRAM – TANTRAM – prayer – technologies ”**) again) .

First thinking of , this may be a single fault , or anything with this bottle of oil will be wrong ,

– I rushed to my well – known organic food – store of my friends – and what a surprise , – **also here the food – items where just showing the same** (- for me with about 25 years of practice , - never seen or known before -) **behaviours !!!**

Testing then the different items with the store – owner and a few just there customers , – with a very impressive kind of the kinesiological muscle – test ,

– we saw at once , – that we have to pray for every single item and sort of food (- but not for any single bottle or package ; -) with flowing love from our heart by additional usage of the **Mudram** (- my other blessing – “ **OM** ” – whirl – structural items I didn't have with me there) ,

– and only though this , - these highly strange apparitions left again .

For me and for all of us it was a big warning and a ringing alarm – bell , – of what could happen soon (- and this also with pure organic (- but mostly traded with the same low morals as everything today) - **Bioland** – and bio – dynamical **Demeter – products** ; - so but what will than happen with all the conventional – called - with extreme amounts of chemicals and toxins - not grown - , - but produced food ?) ;

- and we as I felt , – that it is not enough if only I – **Botida** and a few other persons here on earth will be conscious about the deeper environmental or spiritual cosmic mechanisms and are practising the needed help and prayers alone in remained silence ;
- no , – now the earth is showing and reminding us deeply , – to spread this knowledge for the best help of anyone and the whole entire cosmos suchlike , – that anyone could understand , feel , meet or test the essential criteria (- through the - "**How to feel and to qualify finest energies** " - methods) himself or herself – , and to change – , practice and

live **Him – She – It – Self** accordingly **!!!**

So with greetings and all the best for all of **You** , **Yours**
