Water – The Key of Healing and Transformation – Processes

B a s i c s

4

Are we now opening our view to the health of the whole environment , the health of forests , of rivers , of the (- also for us agricultural used -) soils , of whole landscapes , of personal houses , cities , of lakes and the ocean , of the air and atmosphere of all the human – beings of the plants and animals around ,

we could – and have to say , that the health – quality of a region or an area is deepest related to the health – quality of its water – threads .

Or in other words , - if the terrestrial threads of water are healthy and vital , also all water – drops (- also rivers and lakes) around , all water – storing vegetable – or animal bodies , all the micro – organisms and so on , all stones with included crystalline – waters , the cloudy atmosphere etc. will react accordingly and the whole surrounding will blossom in happiness .

But if not – , then mostly not !!!

Tries the water – element (- same like the whole nature , whereas even minerals are behaving on the finest level same , but in its finest moves much more slowly and in much longer terms than water (- see at the next side) ; -) (- water - the base of **JALAPAN-CACA** - , **Shabda** - sound , **Sparsha** - touch , **Rupa** - form , **Rasa** - taste , **Gandha** - smell)

- or the water (- , representing the all-powerful supreme loving **ATMA**)
 - as the for us and all living beings most important , - same communicative , evolutionary , educational and transformative - , to expansionary growth of consciousness , to spiritual progress and to love directed holy element (- with its inherent - , mainly through “ **AUM** ” - whirl - structures working cleansing - powers) ,

at any time and always everything and anything

- the very soul – like best –

to uplift and re-establish healthy and nice conditions for the welfare and joy of the whole cosmos , - even under most difficult circumstances and in easier said than done situations ,

- its also soul – like always affected to love , prayer , joy , bliss and happiness of surrounded entities and heals through them and it .

Is so water (- thus or in such way working on the finer levels) in principle (- better to say , in pure (- child – like) conditions , so -) (- in theory also inside our water – bubble – like body) most open to integrate finest energies ,

it (- stores and) radiates them afterwards

(- according to the volume of the energy - influence gotten (- always one) water – body ; -

- and also according of how deep was the influence , stimulus and the experience of what kind of energies where coming inside with what kind of force or power - ;

- or according to its vitality , strength and power of resistance against more difficult energies -

- which is deepest related to his ability to flow free (- and un – channelled , - which means also , - without an from outside violent – stressing pressure , -) in its natural meandered and “ **AUM** ” - whirls creating and generating way (- where its on the finest level always at supra – mental hight and strength , where bad energies couldn’t come inside) ; -

(- all alike our own body’s behaviour with different kinds of - at first lovely – , or second – terrible experiences) -

probably (- according to its place) over long distances and extended periods of time

(- or as long as an new experience (- or energy – input , -) will be such strong and powerful – impressive , that the old one will go backside and the new one will most visible come forth) .

So if we want to solve our own – , all social – and environmental problems on earth and cosmos , we have to help the water and do anything what will make it clear , pure and happy .

Are the threads of water in their whirl – ability very hindered , they need to stay healthy and to do their mission and task properly ,-

- especially nowadays – , in spite of the fact that our beloved mother earth is more and more full of chemical poisons and toxins , which we are throwing onto the earth or fire them into the air (- including also *homeopathic medicals*) ,

above all through (- only then with strong “ O M ” – whirls flowing and natural meandering , -) healthy pure and clean (- and never , - neither outside at their banks , - nor through Dams etc. - then also inside in their natural whirl – and live – potentials blocked – up -) rivers and streams , through strong and big forests , happy also natural – wild animals , plants and also happy human beings , – same children as adults or elders , – all around the world .

Is every drop of water inside a river in an average of **10 000** years inside a river ones more , – all rivers are mixed from holy waters same as soils are mixed with powders of the stars .

If we are remembering ourselves and are same speaking to – as treating the water in rivers , lakes and oceans or wherever as embodiment of

Shakthi – Devi – Ma

**Ganga – Devi , Yamuna – Devi , Kaveri – Devi ,
Godavari – Devi , Sarasvathi – Devi , Narmada – Devi ,
Chitravathi – Devi – MA**

(- all alike Lotus – flowers or **SAHASRA – (MA) – PADMA** - the thousand – leaved Lotus , - the reality effects and character of a " **SA – OM** " sounding body with an opened **7. Chakra** - , - or the **VEENA** ,

- identical with nicest and purest beauty , sweetness , loveliness , - full of **Majesty** ,
- most charming , gentle , graceful and all beings motherly loving , pleasant , highest intelligent , nicest , amiable , congenial , good – natured , cordial , kind , thoughtful , caring , compassionate , considerate , unshakeable , loving , vivid , lucid , brightest and clearest (- like pure water) , - with highest level and strength of character , - full of happiness delight and bliss , forever eternally vernal , - and all with most beautiful expressional song – like intonations of their voices ,

- All the very aspects and realities of our own soul - **Thee ATMA**) ,

it – or better she reacts and answers on the (- and out of the supra – mental -) higher level almost immediately with happiness , - **Samadhi**

(- from - same – **DHI** (- the same **ATMA** – identically intelligence , - **Vivekam** - distinction and vision , - or -) a - **God** – identical mind - ; - everything in bliss through **SATYAM – PREMA** – to **ATMA – JYOTHI** - (- **DHI**) - **S**) ,

bliss and love .

ADDENDUM

**(- same physically as psychically , - so also in their emotions
 and thoughts healthiest , - as inside their self – responsi-
 ble autarky and inside happiness - , - which are both
 most important for a smallest till worldwide functional
 ecosystem ; - untouched , undamaged – and none –
 destroyed -)**

none – manipulated animals , -

- *we are also in highest need of biggest adult trees (- also because of their huge health – securing impression to the groundwater and to the atmosphere) , - of all natural plants , healthy microbes and whatso-ever , -*
- *who are altogether truly – speaking – (- also in the terms of future environmental technologies , -) highly specialised (- supporting , sustaining and powering up the energetically immune – health – forces of nature , - the very -) – Godly embodiments of and for their life - elements , purifying the whole nature through their most effective and lovely induction of “ OM ” – identically whirls and vortexes) ,*

and should protected and supported however possible ; -)
- (- whereas beside of a most varied vital life , nature should be secured at best also full of inner and outside silence (- **SAI** – lence))

- this is not only a far away or allegoric symbolism ,

but reminds us of the fact , that whole nature **including all the animals and plants** are God himself and therefore They are in need (- *especially nowadays , - as all beings -*) our protection and a lived caring love .

But what's with us , – the human beings ?

Is heaven only heaven , – if he's full of endless space (– **VARUNA – AKASHA – ATMA**) and stars , – **but what is man** –

Could we graciously think about reserving about minimum **20 %** of our personal ground – properties for highest varied wild or (- *by using highest polycultural – perma – (- better - **PREMA** -) agricultural – technologies, - then -)* nearly wild surrounding – circumstances , beside of protected plants and animals , even all finer and ethereal beings should have and get (- *even inside our gardens*) some untouched or peaceful space .

If we are going inside of forests onto the ocean or onto lakes , onto the mountains etc. full of silence and are asking for permission if we like to take anything of need (- *You could test and ask it now through the **1. Testing – Method** , seen in the **Basics – 5 - “ How to feel and to classify finest energies ”**) ,*

the whole nature – , even minerals , vegetables or water , mountains and the cosmos , as Your inner self , will be very pleased

and these – “ asked ” things are (- *here , - always dedicating and giving themselves away happily - ; - and only through asking , much more than only with a just prayed **MANTRA** without any notice and feeling inside on our lips , -)* of such highest energetically quality , that You could feel that You’re just loved by them , may be a few days later by eating one .

AMMA – CHI

HER HOLINESS MATA AMRITANANDAMAYI MA DEVI

says ,

“ Nowadays with so much of hurry , noise and confusion in our lives ,
- we could sometimes just sit or stand wherever we are , - calm-
